

## P&D<sup>3</sup> PONTOON

Small cube modular pontoon for lighter duty applications. Easy to configure to fit nearly any shape or size.

Material - HDPE

Size - 0.66m x 0.66m x 0.40m (size of single cube)

Weight - 11kg (weight of single cube)

Floatation Capacity - 350kg per square metre

Colour - Black or Blue (dependent on stock)

Suited to light works including: pedestrian access and work platforms.

Can be configured in almost any shape to suit works.

Resistant to UV rays, frost, sea water, corrosion, chemicals and oil.

Accessories available including pins, posts, cleats, fenders & more.

The use of this modular system allows for a versatile and bespoke solution tailored to your exact needs. This is a budget pontoon option, with a range of applications for both mooring and on-water platforms for works of all types. Made in Britain, the P&D<sup>3</sup> pontoon is commonly used for foot traffic, or as access for marine civils works. Secured with pins on each corner, this pontoon can be configured in almost any shape and is available in a 'flooding' option which allows the cube to enter into the water to create a 'drive on' platform for boats and other marine craft.
