Working Depth - Up to 13 feet

Performance - Flow 1500 GPM Max: 1,100 GPM @50 ft TDH

Cutterhead - 66" wide with a 14" diameter.

Engine - Cummins 4 cylinder diesel engine.

Flotation - Two pontoons that are 26 x 22 x 192 inch.

P&D Environmental Ltd offers a wide range of dredging and desilting services for the removal of sediment from a variety of watercourses. Our cutter suction dredging machine is ideal for dredging in hard-to-reach spaces, while creating minimal disturbance to the surrounding area. P&D Environmental Ltd can assist with any planning consents, waste exemption certificates, silt testing and consents for disposal, as well as liaise with farmers and landowners. We can also offer full ecology services through our working relationships with other companies as well as full site and hydrological surveys to assist with your project requirements.
