Available in - 3x2m, 3x1.5m, 3x1m, 2.5x2m, 1.5x1m sections.

EZ Dock floating, modular dock systems are composed of two parts: polyethylene sections and moulded rubber couplers. Both components are made of materials that are completely harmless to the environment and can be recycled when the intended use is finished. EZ Dock provides more stability than traditional floating dock structures which makes it highly suitable for temporary works on the water. Available for works hire throughout the UK, EZ Dock offers a variety of floating dock accessories to make waterfront access more simple including; galvanised handrail, dock ladders, dock bumpers, tie up cleats, edging and outboard brackets.
